

Daily Fresh Indonesia

Company Profile

About Us

One of the subsidiaries of Daily Fresh Foods Group Company in Malaysia, PT. Daily Fresh Indonesia was established in 2003.

In 2008, we established our factory and food processing plant in Indonesia with specialization in processing Sweet Corn product.

The plant is fully equipped with the most advanced and sophisticated technologies, machineries and equipment, especially the advanced freezing system for corn.

Instead of choosing the normal seed, Top Quality Seeds (F1) are used to produce the best quality sweet corn. We make sure our sweet corn are produced from Non-GMO corn seeds.

The freezing system is essentially important as all corn have to be frozen within hours from being harvested in order to capture the finest quality of colour, rich nutrition and natural taste.

Besides exporting Frozen Sweet Corn to Malaysia and Middle East, we also supply various corn, mixed vegetables, sweet potatoes and Dieng potatoes product to local business. Including retail market, supermarkets, hotels, food industry and franchises.

Our Vision & Mission

Vision

To become a worldwide brand that provides high quality, safe, healthy food products that suit all individual's taste and lifestyle.

Mission

- ❑ To be innovative in constant research and development of our product and concept.
- ❑ To enforce team spirit within our organization and encourage personal development through internal and external training.

Daily Fresh – Cup Corn

Daily Fresh Cup Corn is 100% natural, healthy, low in fat and high in fiber. A special technique of processing the corn is being used to retain its nutrients and sweetness. This technique produces corn in the form of Whole Kernel “Non-Cut”. The Corn is steamed at a specific temperature to retain its nature juiciness and golden colour prior to serving.
